Knuckles	\$ 40.00
Hands	\$ 100.00
Knuckles & Hands.....	\$ 120.00

Why Healthy Tanning

Indoor tanning can actually protect your skin from a burn because it's **controlled** UV exposure to gradually develop a natural sunscreen on your skin, often called a **base tan**.

Vitamin D "the sunshine vitamin" is a hormone produced when the skin is exposed to sunlight or indoor tanning units. Vitamin D helps our bodies absorb calcium and other nutrients, making our bones stronger and improving our immune system. Lack of vitamin D contributes to heart disease, diabetes, multiple sclerosis and many forms of cancer.

Many people frequent tanning beds for self treatment of psoriasis, eczema, acne, vitiligo, SAD (Seasonal Affective Disorder), to get a base tan, or just to look and feel great!

We also offer spray tans which are 100% UV free, instant and state of the art.
